

STEP-BY-STEP GUIDE TO PARTICIPATING IN THE PRE-LAUNCH AND PUBLIC LAUNCH OF STYL TOKENS

OVERVIEW: INTRODUCTION TO CRYPTOCURRENCY AND STYL TOKENS

What is Cryptocurrency?

Cryptocurrency is a form of digital currency that relies on cryptographic technology to secure transactions. Unlike traditional currencies, cryptocurrencies operate on decentralized networks like blockchains, which means transactions happen directly between users, without the need for banks or middlemen.

What is STYL?

STYL is a cryptocurrency token being developed by lifeStylistic. It is being deployed on Polygon, a Layer 2 solution built on top of the Ethereum blockchain. By purchasing STYL tokens, you are helping to seed fund LifeStylistic.com. In return, you will hold STYL tokens, which will eventually be used for transactions and access to exclusive content within the lifeStylistic ecosystem.

UNDERSTANDING POLYGON AND ETHEREUM

What is Polygon?

Polygon is a Layer 2 platform built on top of Ethereum. It improves Ethereum by making transactions faster and cheaper. Ethereum is known for its security and decentralized nature, but it can be slow and expensive due to high gas (transaction) fees. Polygon helps solve these issues by processing transactions off the main Ethereum chain (Layer 1) and then finalizing them on Ethereum in bulk. This reduces congestion and keeps fees low, while still benefiting from Ethereum's security.

Advantages of Polygon

- 1. Faster Transactions:** Polygon can process transactions in seconds, compared to Ethereum's slower speeds.
- 2. Lower Fees:** Gas fees on Polygon are much cheaper, usually costing fractions of a cent compared to the high fees on Ethereum.
- 3. Ethereum Compatibility:** Even though it's faster and cheaper, Polygon is fully compatible with Ethereum, so it can use Ethereum's infrastructure and assets.

PRE-LAUNCH SALE: EXCHANGING CRYPTOCURRENCY FOR STYL VIA PROMISSORY NOTES

During the pre-launch phase, you will not be able to purchase STYL tokens directly on LifeStylistic.com. Instead, you will have the opportunity to participate in the pre-launch sale by exchanging other cryptocurrencies for STYL tokens via a promissory note

HOW THE PRE-LAUNCH SALE WORKS:

1. Send Us Cryptocurrency: You will send us a cryptocurrency like Bitcoin (BTC), Ethereum (ETH), or MATIC (the native token of Polygon). These funds will help seed the company and create a liquidity pool, which is necessary to ensure there is enough supply and demand for STYL tokens when they launch.

2. Receive a Promissory Note: In exchange for your contribution, you will receive a promissory note, which is a legal agreement stating that you will receive a specified amount of STYL tokens once the token is officially launched. The terms and amount of STYL you will receive will be clearly outlined in this note.

3. Building Seed Funds: The seed funds raised during the pre-launch will be used to fund company development, marketing, and the creation of the liquidity pool for STYL tokens. The liquidity pool is critical as it ensures there are enough tokens available for buying and selling on the open market.

4. Public Launch: Once we have gathered sufficient seed funds, we will move forward with the public launch of STYL. At this point, you will receive your STYL tokens based on the terms of the promissory note.

EXAMPLE OF THE PROCESS

Exchanging Bitcoin for STYL via a Promissory Note

Imagine you want to participate in the pre-launch sale of STYL. You send 0.1 BTC (Bitcoin) to lifeStylistic's specified wallet address. In return, you receive a promissory note that guarantees you will receive 500 STYL tokens once the public launch occurs. Once the public launch happens, you redeem your promissory note and get 500 STYL deposited into your wallet.

PUBLIC LAUNCH: HOW TO BUY STYL ON MAJOR EXCHANGES

After the pre-launch phase, STYL will officially be launched and listed on major cryptocurrency exchanges, making it widely available to the public.

BUYING STYL TOKENS DURING THE PUBLIC LAUNCH:

1. **STYL Listed on Major Exchanges:** Once the public launch occurs, STYL tokens will be listed on popular cryptocurrency exchanges such as Coinbase, Binance, and Kraken. These exchanges are platforms where people can buy, sell, and trade cryptocurrencies.

PURCHASING STYL ON AN EXCHANGE

1. To buy STYL on a major exchange, you will need to create an account with that exchange if you don't already have one.
2. Once you have an account, fund it using your local currency (like USD, EUR) or another cryptocurrency.
3. Navigate to the trading section and search for "STYL."
4. Enter the amount of STYL you want to purchase, review the transaction details, and complete the purchase.

EXAMPLE OF THE PROCESS

Purchasing STYL on Coinbase

After the public launch, you decide to purchase more STYL tokens on Coinbase. You log in to your Coinbase account, deposit \$100 in USD, and use it to buy 200 STYL tokens at the current market price. You then transfer the tokens to your MetaMask wallet for safekeeping.

STORING STYL IN YOUR WALLET

After purchasing STYL on an exchange, you can store the tokens in your exchange account, but it is recommended to transfer them to a personal cryptocurrency wallet like MetaMask or Trust Wallet for greater security.

USING STYL TOKENS ON LIFESTYLISTIC.COM

Once STYL tokens are publicly launched and available on major exchanges, you will be able to use them within the lifeStylistic ecosystem. Some uses for STYL include:

1. **Accessing Exclusive Content:** STYL holders will have access to premium content and events
2. **Participating in Loyalty Programs:** STYL tokens may be used to unlock special offers, discounts, or other loyalty rewards on lifestylistic.com
3. **Future Governance:** Holders of STYL tokens might be able to participate in decision-making processes on the platform, such as voting on new features or initiatives

SETTING UP YOUR CRYPTOCURRENCY WALLET

What is a Wallet?

A cryptocurrency wallet is a digital tool that allows you to store, send, and receive your tokens. You will need a wallet to store your STYL tokens once you have purchased them.

How to Set Up MetaMask for Polygon

MetaMask is one of the most popular wallets for interacting with Ethereum and Polygon. Here's how you can set it up:

INSTALL METAMASK

1. If you're using a computer, visit <https://metamask.io> and download the browser extension.
2. If you prefer mobile, download the MetaMask app from the App Store or Google Play.

CREATE YOUR ACCOUNT

1. Open MetaMask and click "Create Wallet."
2. Follow the steps to set up your account. You'll be given a secret recovery phrase (12 words). Write this down and store it somewhere safe—this phrase is the only way to recover your wallet if you lose access.

ADD THE POLYGON NETWORK

1. MetaMask connects to the Ethereum network by default, but since STYL operates on Polygon, you'll need to add Polygon manually.
2. Click on the network dropdown and select "Add Network."

Input the following details:

4. Network Name: Polygon
5. RPC URL: <https://polygon-rpc.com/>
6. Chain ID: 137
7. Currency Symbol: MATIC
8. Block Explorer URL: <https://polygonscan.com/>
9. Click "Save." You're now connected to the Polygon network.

SUMMARY

1. STYL is being launched on Polygon, a Layer 2 solution on Ethereum that offers fast and cheap transactions.
2. During the pre-launch sale, you will exchange other cryptocurrencies for STYL via a promissory note, which will be redeemable for STYL tokens once we have enough seed funds to launch the token.
3. After the public launch, STYL will be listed on major exchanges, making it available for purchase by anyone.
4. Once you own STYL tokens, you can use them on lifestylistic.com for various benefits, such as exclusive content, loyalty rewards, and future platform governance.
